Destri Putri Natalia

Fullstack Developer

Jakarta Raya, Indonesia

Ringkasan

I'm a fullstack developer specializing in backend development, with experience building enterprise HRIS and payroll systems that support critical business operations. I develop scalable backend services for employee management, attendance, leave management, payroll processing, tax and BPJS calculations, and other business workflows where accuracy and reliability are essential. I also contribute to full-stack development using Next.js when projects require end-to-end solutions. My primary stack includes TypeScript, NestJS, PostgreSQL, Next.js, RabbitMQ, Redis, and Docker. I'm currently learning Go and gRPC to deepen my understanding of distributed systems and modern backend architecture. I enjoy turning complex business requirements into clean, maintainable software that delivers real value for users and organizations.

Pengalaman

PT INDONESIA KREATIF TEKNOLOGI

Fullstack developer

September 2025 - Present (1 tahun 1 bulan)

- Developed and maintained backend services for an enterprise HRIS, covering employee management, attendance, leave management, permissions, and organizational workflows.
- Designed database schemas and implemented backend features for Payroll modules, including payroll generation, overtime calculations, tax (PPH 21), BPJS processing, payroll previews, and payroll-related business logic.
- Built RESTful APIs using TypeScript, NestJS, and PostgreSQL with a focus on clean architecture, scalability, and maintainability.

- Implemented asynchronous notification workflows using RabbitMQ and Firebase Cloud Messaging to improve system reliability and user communication.
- Contributed to WorkNation, a recruitment platform, by developing backend features supporting job postings, candidate management, recruitment workflows, and system integrations.
- Collaborated with frontend developers using Next.js to deliver end-to-end features across HRIS and recruitment platforms

Proxycurl

Software Engineer

November 2024 - Januari 2025 (3 bulan)

Singapore

qbit

Fullstack Developer Intern

Maret 2024 - November 2024 (9 bulan)

Jakarta, Indonesia

- Maintain Website & Resolve Bugs with React: Regular updates and debugging of React-based websites.
- Build CMS Using React: Develop content management systems with React for easy content handling.
- Develop and implement RESTful APIs using Node.js for the server-side runtime environment and TypeScript for enhanced type safety and code quality.
- Manage Data with PostgreSQL: Utilize PostgreSQL for efficient data storage and management.
- Test API Endpoints with Swagger: Use Swagger for API design, testing, and documentation.

M-Knows Consulting

Back-End, API and Database Developer

Agustus 2023 - Desember 2023 (5 bulan)

Jakarta Selatan, Jakarta, Indonesia

- As the Person in Charge (PIC) of the project, my main task is to ensure that team members work efficiently and I am responsible for facilitating communication between team members, scheduling

meetings, and providing solutions to obstacles that may arise.

- Solve a problem that exists around and create feature with a team as a backend developer
- Involved in the development of new features, Using Express.js, I managed the HTTP request workflow, ensuring seamless interaction between client and server, and By integrating TypeScript in development, I added a layer of security and improved the readability of the project code.
- Using PostgreSQL for data storage and management.
- Using Postman API for testing endpoint

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka Cloud Computing Cohort

Februari 2023 - Agustus 2023 (7 bulan)

Indonesia

- Get learning and mentoring related to cloud computing such as the basics of Cloud Computing to building a highly available cloud architecture using various services available on GCP (Google Cloud Platform), creating back-end applications etc.
- Solve a problem that exists around and create a project /app to overcome it with the capstone team as a final project.
- Get learning about Logging, Monitoring, and Observability in Google Cloud. So that it can utilize monitoring tools for preventive and corrective action when troubleshooting

President University Major Association of Computing (PUMA Computing)

2 tahun

Member of Student Welfare Advocacy

2021 - Januari 2023 (2 tahun)

Indonesia

- Serve as a representative and advocate for student welfare within the university community.
- Address and communicate student concerns, needs, and issues to relevant university departments and administration.
- Collaborate with student government and other organizations to amplify student voices.

- Crisis Response and Support, provide support and resources for students during times of crisis or emergencies.

Fund Raising at Computing Visit

Agustus 2022 - November 2022 (4 bulan)

Indonesia

- Marketing and Promotion, like utilize social media, email campaigns, and other channels to raise awareness.
- Event planning and coordination, develop event concepts and themes to attract sponsorship and participants
